Instapak® 901

Foam-in-Place Packaging System

 **SYNERGY**
packaging•solutions

Workstation, Instapak® chemical drums and film not included.

Model 901

The most advanced hand-held dispensing system

Foam output controls, built-in timers and self-diagnostic features continually monitor system performance. All information is reported on the console's easy-to-read message centre.

The Instapak® 901 system features a patented, self-cleaning cartridge dispenser that delivers high quality Instapak® foam.

 **Sealed Air**

Our Products Protect Your Products®

Total control - optimum performance

- **Economical**

Built-in timers let you control the amount of material used. A series of 10 dispense times can be pre-set to simplify your packaging process.

- **Flexible**

The 901 system can be adjusted (from 2 to 4 kg/min.) to dispense foam at the ideal rate for your application.

- **Simple**

The all electric 901 system can be installed in minutes. No scheduled maintenance is required.

- **Reliable**

The electric pumps, self-diagnostic controls and patented self-cleaning dispenser ensure top quality Instapak® foam.

- **Safe to use**

The 901 system meets all major international product safety standards.

 Conforms to all relevant CE directives.

Sealed Air® support services

- Packaging design and testing.
- Site layout assistance.
- Equipment installation.
- Operator training.

Specifications

Electrical requirement:	380 - 415 VAC, 16 A, 3 phase, N, earth.
Receptacle type:	CEE 17 (5-pole, 16 A).

Manufactured by
Sealed Air Corporation.
