

Foam-in-bag packaging at the touch of a button

A new world of packaging speed and versatility

For high-volume packaging applications, nothing measures up better than our patented SpeedyPacker® Insight™ system. Versatile and efficient, you can dedicate a system to one packaging line or serve multiple lines with one system.

With a simple touch of a button, the SpeedyPacker® Insight™ system can produce up to 21 Instapak® foam-filled cushions per minute, increasing the productivity of your operation.

With an expansion rate of up to 280 times its liquid volume, Instapak® foam delivers significant savings in storage space and material handling costs compared to traditional packaging materials.

The SpeedyPacker® Insight™ system delivers cost effective, superior product protection and presents your product to your customers in an attractive, damage-free package.

Foam-in-Bag Cushioning

For high speed, custom-fit cushioning or heavy-duty blocking and bracing applications, nothing protects products better than Instapak® foam-in-bag packaging.

Combination Cushioning

Combine foam-filled bags and Continuous Foam Tubes (CFTs) to create cushions for your most demanding packaging assignments.

Continuous Foam Tube (CFT) technology lets you use the SpeedyPacker® Insight™ system to produce a series of foam-filled tubular bags.

One Touch Operation

Maximise efficiency, minimise waste, with the touch of a button

Our new graphical display lets the operator

Continuous Foam Tubes

Flexible Continuous Foam Tubes (CFTs) can be used

Combine the speed of a foam-in-bag system with the protective properties of an engineered packaging solution

When combined with one of our Instapak® moulding systems, the SpeedyPacker® Insight™ system can instantly produce a custom-shaped cushion that provides exact product positioning and engineered package performance.

The SpeedyPacker® Insight™ Foam-In-Bag moulding process

The SpeedyPacker® Insight™ system provides a fast, economical solution for your on-line void fill applications

Perfect for busy “pick and pack” operations and distribution centres. Since Instapak® foam expands up to 280 times its liquid volume, the SpeedyPacker® Insight™ system frees up valuable warehouse space. The equivalent of a trailer load of packaging materials can be stored in two 210 litre drums.

Foam-in-Bag process

1. With the touch of a button, the operator selects the proper bag length and amount of Instapak® foam.

2. The operator places the foam-filled bag into the carton and nestles the product onto the expanding cushion.

3. A second foam-filled bag is placed on top of the product, and the carton flaps are closed.

4. The foam-filled bag expands around the product to form a top cushion.

Continuous Foam Tube (CFT) process

With the easy-to-use control panel, the operator can select a series of CFTs or specify gaps of film between foam tubes. Tube diameter and length can also be adjusted.

Insert spaces between tubes to provide protection where needed.

SpeedyPacker[®] Insight[™] benchtop foam-in-bag system

For shipping room, stand-alone or multiple workstation environments, the SpeedyPacker[®] Insight[™] benchtop model is fast, compact and convenient.

Shown with optional workstation.

- Machine Size:** 1,3m wide x 0,8m deep x 1,2m high
Film Size: 30cm and 47cm widths available
Production Rate: (21) 30cm bags per minute, 50% foam-filled

Instapak[™] Twin Vertical Moulding Station

- Low initial investment
- Up to 100 cushions per hour
- Floor space requirement: 1,5m²
- Electrical: 10A, 220-240 VAC, 1, N, PE

SpeedyPacker[®] Insight[™] floor model foam-in-bag system

On-line, on demand, or linked with a moulding station, nothing can outperform a height-adjustable SpeedyPacker[®] Insight[™] packaging system.

- Machine Size:** 1,3m wide x 1,0m deep x 2,0m to 2,65m high
Film Size: 30cm and 47cm widths available
Production Rate: (21) 30cm bags per minute, 50% foam-filled

System Power Requirements

- Electrical:** 380-415 VAC, 16A, 3 phase, earth, neutral
Receptacle Type: CEE 516/6H (5-pole, 16A) UL and CE approved

Instapak[®] Moulding Wheel

- Space efficient 6-mould configuration
- Up to 300 cushions per hour
- Floor space requirement: 2m²
- Electrical: 10A, 220-240 VAC, 1, N, PE
- Air requirement: 5,5 bar (2-8 l/min.)

Instamoulder[™] High-Speed Cushion Moulding System

- Ideal for high volume packaging operations
- Up to 12 moulds available
- Up to 600 cushions per hour
- Floor space requirement: 4,5m²
- Electrical: 380-415 VAC, 16A, 3 phase, earth, neutral
- Air requirement: 5,5 bar (2-8 l/min.)

Instapak[®] Pad Moulder

- Create flat pads ranging in thickness from 1,2cm - 7,5cm
- Up to six 43cm flat pads per minute
- Floor space requirement: 1,5m²
- Electrical: 10A, 220-240 VAC, 1, N, PE
